Yusuf Uysal

FULL-STACK DEVELOPER

+90 (542) 471 38 18 - yusuf@yusufuysal.com - LinkedIn - GitHub - Personal Blog - Ankara/Türkiye

Frontend-focused Full-Stack Developer with 3+ years of experience contributing to 10+ production web projects across SaaS, B2B, and client projects. Experienced in building end-to-end features with React.js, Next.js, TypeScript, and Tailwind CSS across frontend, API integration, and backend services using Node.js, Firebase, and MongoDB. Continuously exploring AI-driven development workflows to improve software quality, development speed, and engineering productivity.

SKILLS

Programming Languages: JavaScript (ES6+), TypeScript
Frontend: React.js, Next.js, Redux, Zustand, TanStack Query, Tailwind CSS, Shadcn UI, Material UI, HTML5, CSS3
Backend & Database: Node.js, MongoDB, Firebase, Supabase
Core Competencies: Responsive Design, Web Performance, UI/UX, Accessibility, Browser Compatibility, API Integration
Tools: Git, Docker, Vite, Webpack, React Testing Library, ESLint, Prettier
Languages: English (Advanced), Turkish (Native)

EXPERIENCE

Upper Social | **Full-Stack Developer** Sep 2025 - Apr 2026

- Improved code quality across a 5-person team by introducing regular code reviews and reusable React/Next.js component patterns, making future feature development faster and more consistent.
- Delivered major platform modules including AI Assistant, Calendar, and Time Tracker using React, Next.js, and TypeScript, expanding the platform's core functionality.
- Implemented backend APIs with NestJS and reusable React components, streamlining integration across the task board, proposals, and messenger modules.

Freelance | **WordPress Developer** Jun - Aug 2025

- Designed and developed custom WordPress websites, including a landing page and a food discovery platform with user reviews, direct messaging, and community-generated content.

Bradi.tech | **Full-Stack Developer** Sep 2024 - Mar 2025

- Integrated frontend interfaces for AI-powered features, including virtual try-on and AI video generation for the Outfica e-commerce platform using Next.js, reducing content production timelines from weeks to hours.
- Translated Figma designs into responsive, pixel-perfect interfaces using Next.js, TypeScript, Tailwind CSS, and Shadcn UI for multiple client MVPs.
- Designed and implemented a full-stack tournament module for the MetaZoo trading card platform, supporting single-elimination, Swiss, and round-robin tournament formats using Next.js.

Enbiosis | **Full-Stack Developer** Oct 2023 - May 2024

- Integrated Krona analysis into a Node.js reporting engine with interactive React visualizations powered by a Nextflow/Python pipeline, with practitioner feedback indicating an approximately 40% improvement in understanding taxonomic data.
- Developed 20+ pages for the company's B2B platform using React and Redux, implementing Role-Based Access Control (RBAC) and responsive user interfaces for patient, practitioner, and partner portals.
- Enhanced the company's global WordPress website through UI/UX improvements, multilingual support (i18n), and SEO, expanding its accessibility for international audiences.

Eria Technology | **Full-Stack Development Intern** Jul - Aug 2023

- Developed an R&D prototype using React, Material UI, and Node.js, integrating a Python pipeline that processed 17k+ drug records for pharmacy price analysis across 6k+ pharmacies.

Z Yazılım (cubicl.io) | **Backend Development Intern** Feb - Jun 2023

- Built TypeScript integrations for the Monkedo iPaaS platform, connecting 10+ APIs including Stripe, GitHub, and Notion through Pipedream workflows.

Jotform | **Frontend Development Intern** Aug - Sep 2022

- Developed the React frontend for an internal email tracking tool and collaborated on PHP API endpoints to automate repetitive support workflows, saving an estimated 12–16 hours of manual work per month.

EDUCATION

Abdullah Gul University Bachelor's Degree in Computer Engineering (100% English) - GPA:3.2/4 2018-2023
